

Now, more than ever, producers must meet rigorous standards for ensuring compliance with safe food, animal well-being, environment and worker safety. ASSURANCE provides a streamlined, cost effective approach to the current oversight process while adding visibility and accountability to your operation and providing insight to drive better business decisions.

# MAXIMIZE OVERSIGHT AND PERFORMANCE

Maximize your oversight and performance through increased efficiency and management of audit and assessment tracking and quality assurance certification on a single platform. ASSURANCE is an automated compliance and quality management solution designed specifically for livestock production assessment and certification processes. The program offers real-time oversight across your production system and a streamlined approach to enter and track assessments through a mobile application. From a single-unit farm to large integrated operations, ASSURANCE was designed and developed to meet the demands of modern livestock production, raising the bar by leveraging technology to solve real-world inefficiencies.

## Streamline processes. ✓

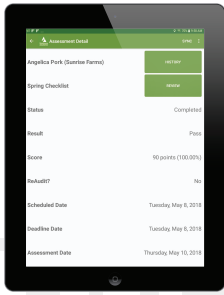

- Reduce data entry and paperwork with automated reporting to external auditors and industry compliance.
- Mobile app simplifies remote assessments and works off-line.
- Pre-loaded industry audits (Common Swine Industry Audit and PQA® Site Assessment).
- Seamless integration with Pork Checkoff, industry partners and MetaFarms Agriculture Platform.

## Maximize oversight. ✓

- Implement risk management and oversight strategy that connects results to performance.
- Create, schedule, track and manage audits, assessments and certifications.
- Reduce costs with improved accuracy, efficiency and accountability.
- Quickly and easily access actionable information on-demand through cloud-based platform and mobile app.

## Optimize operations. ✓

- Gain increased visibility and insight.
- Roll-up results over time to identify trends and take corrective actions.
- Increase accountability with data and reporting rolled up at an organizational level or narrowed down to an individual site or auditors.
- Connect results and scores to production performance.

## Mobile App Capabilities:

- Remote access to audits and assessments.
- Entries can be entered on-site and off-line.
- Historical audits can be called up on the spot.
- Tailored categories, questions and values.
- Completed forms synced and saved.
- Print directly from app.

## Features:

- Developed specifically for you the producer.
- Customized interface and reports per producer, site, barn, and user.
- Simple and easy to use (intuitive UX).
- User-based security roles.
- Familiar “off-the-shelf” Android or iOS tablet.
- No specialized equipment or training needed.

“The ability to digitize audit results and use them to mine drivers behind performance discrepancies is absolutely core to our future.”

– Associate Director of Technical Services, Powerhouse Producer

## HOW IT WORKS

### Compliance Manager

#### Complete Audit Management:

- Create/Design audits
- Schedule
- View status

#### Track Personnel Certifications

#### Automated Reporting to:

- Auditors
- Management
- Packers

#### Overall Visibility of Operation

### MetaFarms Agriculture Platform

#### External Auditors

Sync audits

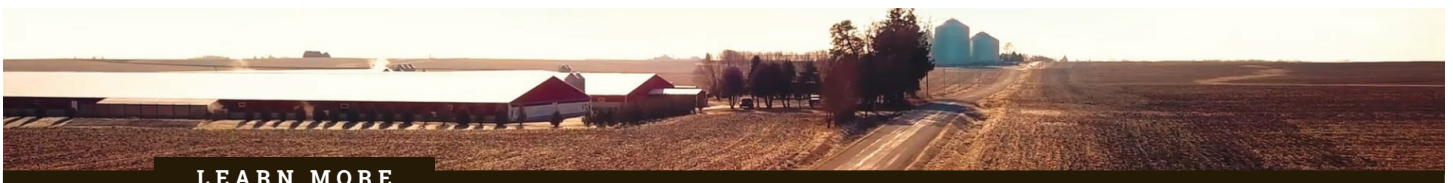

#### Industry Compliance

Sync audits

Sync audits to tablet and completed audits to platform

#### Internal Auditors
