

Measure and manage your production performance with the most comprehensive and intuitive information platform in the industry. FINISH is completely integrated with MetaFarms' SOW, SALES and INSIGHTS providing an integral foundation for a complete cloud-based system. Save time with industry data integrations, customized and scheduled reports and gain insights to drive better business decisions.

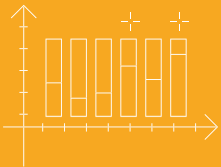

## MetaFarms' FINISH PRODUCT SHEET

COMPLETE PROFIT & PERFORMANCE SYSTEM

## MONITOR... MEASURE... MANAGE...

Gain a more precise view of your production operation. FINISH is a dynamic program for tracking your grow finish (nursery, finish and wean-to-finish) operations for both active group and closeout performance. All the aspects of production are tied together with FINISH through industry data integrations and mobile apps. Pro-actively manage production performance and costs with current real-time data.

From a family farm to large integrated operations, FINISH was designed and developed to meet the demands of modern livestock production, raising the bar by leveraging technology to solve real-world inefficiencies.

### Efficient Data Capture.

- Actively manage barns and health.
- Record detailed production data, including inventory events, health updates, expenses, feed deliveries, carcass data and much more...
- MORTALITY mobile app simplifies and expedites loss recording.
- Reduce data entry and paperwork through data imports and integrations with accounting, feed and packer software systems.

### Detailed Insights.

- Quickly and securely produce detailed or summary reports by multiple levels of filters such as: flow, business unit, producer, health status and more.
- Reduce costs with improved accuracy, efficiency and accountability.
- Quickly and easily access actionable information on-demand through cloud-based platform.
- Traceability through entire production lifecycle.

### Optimize Operations.

- Gain increased visibility and insight.
- Roll-up results over time to identify trends and take corrective actions.
- Increase accountability with data and reporting rolled up at an organizational level or narrowed down to an individual barn.
- Empower people throughout animal lifecycle with detailed, valuable information.
- Access info from tablet or desktop with cloud-based system.

## MORTALITY Mobile App:

- Record mortalities right on phone (Android or iOS).
- Required fields and flags for missing entries.
- Record daily or weekly.
- Monitor mortality trends.
- Alerts for missed recordings.
- Unique set-up to each user.

## Features:

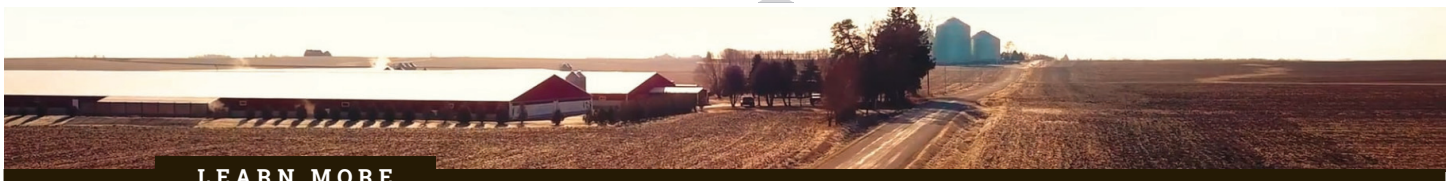

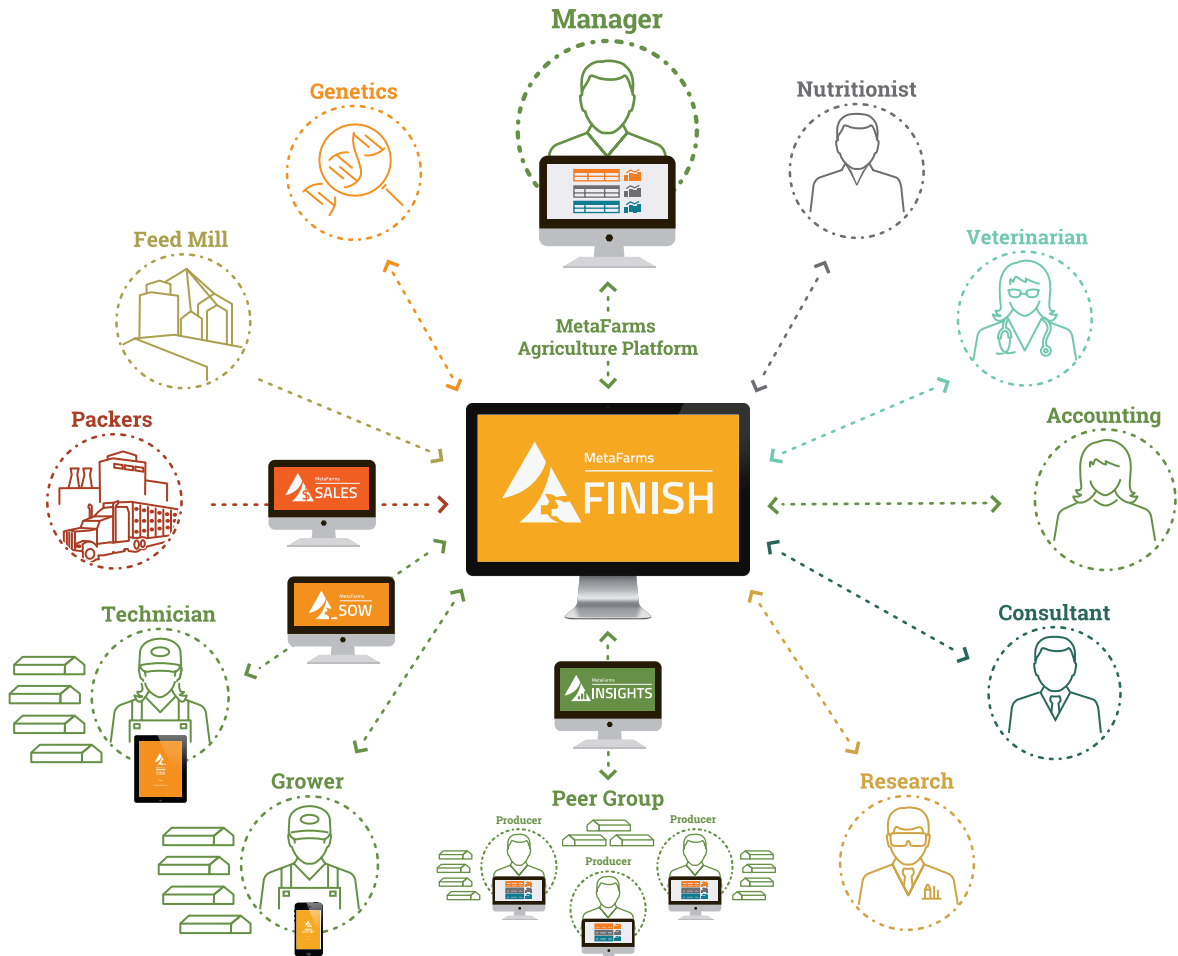

- Customized interface and reports per producer, site, barn, and user.
- Simple and easy to use (intuitive UX).
- User-based security roles.
- Bilingual toggle (English and Spanish).
- No specialized equipment or training needed.

*"MetaFarms has provided us with very detailed reports with the ability, to mine or filter raw data, to answer specific questions. It's extremely useful to pull reports 'on the fly' from any computer with Internet. In addition, customer support has been quick to answer technical questions and to recommend reports that enhance on-farm productivity."*

*– Ben Johnson, Manager, Grandview Hogs*
